PLUMBING SYSTEMS

Multilayer Piping Systems

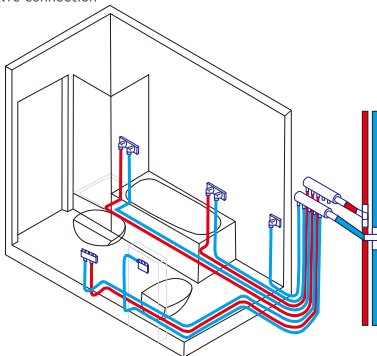

Based on Rifeng Multilayer Pipe, the system is built for safety and reliability, using corrosion-proof components assembly is clean, safe and fast. The smooth inner surface of Rifeng Pipe prevents deposit accumulation and corrosion, leading up to 30% more flowing than metal pipe. Combining the advantages of plastic and metal, Rifeng Multilayer Pipe is ideal for all common hot and cold water installations. Rifeng Pipes and Fittings carry the NSF and DVGW certificate for potable water.

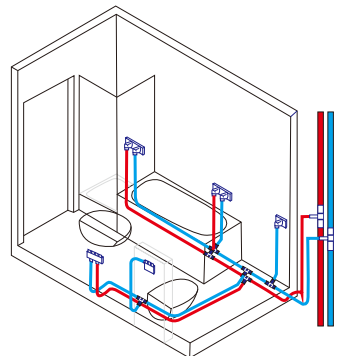

● Manifold installation

- Easy planning
- Simple determination of pressure loss and rating
- Low pressure losses
- No connection points underfloor
- Less fittings required
- Individual valve connection

● Tee installation

- Supplying several tappings with one pipe
- Less pipe required
- For renovation installation in existing slots
- Individual valve connections

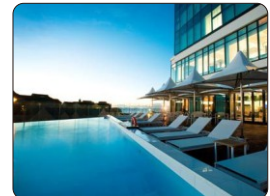

Radisson Blu Hotel Port Elizabeth

Project Reference For Plumbing

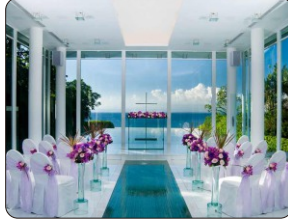

Country: South Africa
Type: Five Stars Hotel
Products: Rifeng Multilayer Pipe, Press Fittings

Radisson Blu Hotel' s location is near Port Elizabeth city centre and transport options. This hotel' s address close to Port Elizabeth city centre provides proximity to several transport options and to the stunning coastal scenes of this South African city. Easily access Port Elizabeth via the myriad of roadways, and then once in the city, take advantage of the bus system to reach attractions like Nelson Mandela Bay Stadium, Schotia Safaris Private Game Reserve and Greenacres Shopping Centre.

The Rock Bar Project AYANA Resort And Hotel

Project Reference For Plumbing

Country: The Ritz–Carlton, Bali, Indonesia
Type: Five Stars Hotel
Products: Rifeng Multilayer Pipe

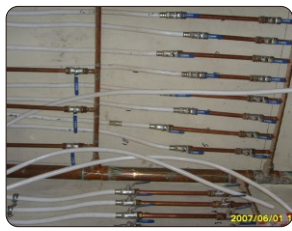

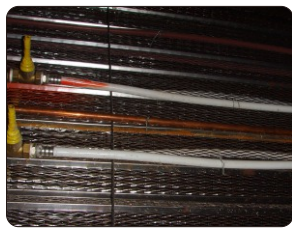

The Rock Bar is probably one of the more interesting places to get a drink in Bali. It's located in Jimbaran, at the Ayana Resort and Spa, which in itself is worth checking out for the resort design and awesome views over the ocean and on to distant volcanoes of Java.

The Rock Bar is part of the hotel, and located on a rock that juts out into the ocean, at the bottom of the cliff that leads down to the water from the main resort. You need to take a mini elevator type device to get down.

SunCoast Hotel

Project Reference For Plumbing

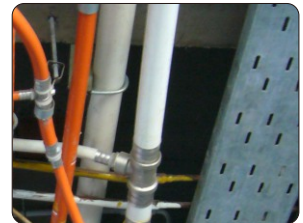

Country: South Africa
Type: Five Stars Hotel
Products: Rifeng Multilayer Pipe

SunCoast Hotel located on the Durban North Beach with direct access to the beach. It is part of the greater SunCoast Casino complex. It is a short distance from the Moses Mabhida stadium making it ideal place to stay for any one visiting a sporting event at the stadium. The hotel is 2.5 km from Durban convention centre.

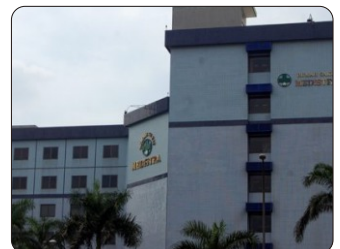

The Medistra Hospital

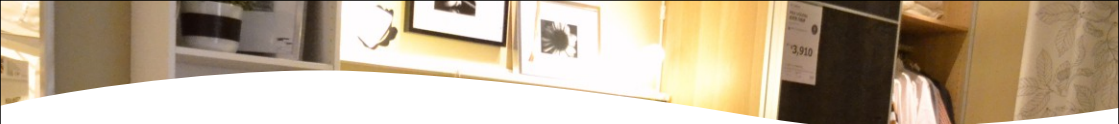

Project Reference For Plumbing

Country: Indonesia
Type: Hospital
Products: Rifeng Multilayer Pipe, Press Fittings

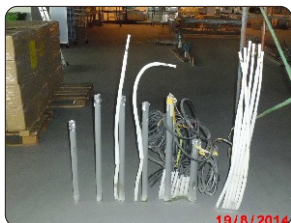

The Medistra Hospital is located in down town Jakarta, Indonesia. The whole building has been installed with the RIFENG cold and hot water piping systems (white color HDPE–AL–HDPE pipe and orange color PEX–AL–PEX pipe with the F5 U profile press fitting). The quantity of the pipes is more than 10,000 meters.

IKEA Store

Project Reference For Plumbing

Country: Indonesia
Type: Shopping Mall
Products: Rifeng Multilayer Pipe

IKEA , featuring scandinavian modern style furniture and accessories. Include storage options, lighting, decor products, kitchen appliances and pet care.

Project: HSB Turning Torso (skyscraper)

Country: Malmö, Sweden

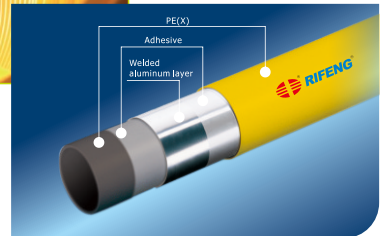

Products: Multilayer pipes

GAS SYSTEMS

Approved and certified by SAI Global, SGS for gas distribution in homes and other buildings, Rifeng Gas System combines Rifeng Multilayer pipes, fittings, excellent components and installation tools.

The application of multilayer pipes is increasing year by year in many fields not only for residential but also in industry and engineering sites. By comparing with traditional pipe, the multilayer pipes have better airproof function and longer life span. The Rifeng multilayer pipe is a pipe generation that unites the advantages of plastic and metal pipe and offers a high degree of flexibility and toughness, coupled with high pressure and temperature resistance. The Rifeng multilayer pipe consists of an inner and outer layer in between which there is a layer of overlap-welded aluminum, and the three layers are made to form a permanent structure by means of special bonding layers.

Today's stringent technical standards for gas distribution in homes, makes multilayer pipe a natural choice. In outdoors installations, the pipe's resistance to rupture and other technical properties permit the use of innovative techniques such as "no sand–no dig" installations. In most applications, even under very tough environmental conditions, the Rifeng Multilayer Piping System will remain more resistant and safer than a conventional polyethylene Gas Piping System.

Multilayer Gas pipe

- Overlapped welded pipe is co-extruded with one step with perfect adhesive between inner layer and aluminum, high and stable pressure resistance, of which welding style is ultrasonic.
- Butt welded pipe is moulding with several steps that is argon-arc welding style.

Office Building in Melbourne CBD

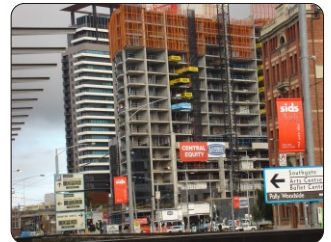

Project Reference For Gas

Country: Australia
Type: Office Building
Products: Rifeng Multilayer Gas Pipe

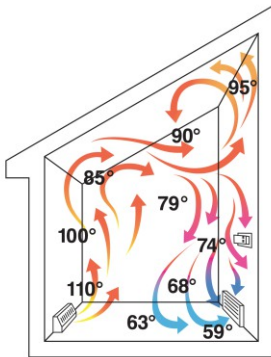

Gas Project

The above two buildings under construction are the commercial buildings nearby Melbourne EXPO Center in Melbourne CBD area, installed Rifeng gas system (Yellow outside, transparent inside PAP pipe and F5 U profile press fitting, dimensions from 1620--5163), the pipe quantity for this project exceeded 50,000 meters, the whole project is over US\$200,000.

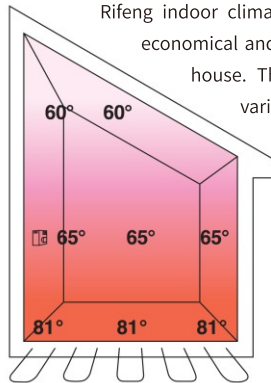

INDOOR CLIMATE SYSTEMS

Rifeng Underfloor Heating System-the Natural Choice

Imagine your body is surrounded by a cosy warmth that radiates up from the floor. Underfloor heating turns the floor into a large, gentle radiator a warm, friendly surface that warms your body and the objects in the room. Underfloor heating warms where it is needed: warm feet and cool head-just as the human body requires. It's not wasted up near the ceiling or lost to the outdoors whenever a window or door is opened. Underfloor heating system used to be luxury, but nowadays a convenience which can be taken for granted.

Rifeng indoor climate systems are environmental friendly, economical and reliable solutions for warming up your house. There are different systems suitable for various house designs: floor heating system, wall heating system, radiator heating system.

Rifeng provides you with reliable components for each system from control units to pipes and fittings.

A Complete System Built From Only The Best Components

Rifeng Underfloor Heating is a complete system. It includes manifolds for distribution, pipes coiled for easy handling, room thermostats for control of the room temperature and tools for installation. We make sure that

every single component in our underfloor heating system is designed and produced to the same uncompromising standards. This is proven by our numerous certificates for quality and environmental friendliness.

Heating Pipe For House Building

Project Reference For Heating

Country: America
Type: House Building
Products: Rifeng pex pipe
